

AMIGEMINI

AMIGEMINI

# AMIGEMINI

**AmiGemini is a browser for Gemini, Spartan, Gopher, Finger and Nex.**

**Gopher is a text-only protocol that predates the Web.**

**Gemini is heavier than Gopher but lighter than the Web.**

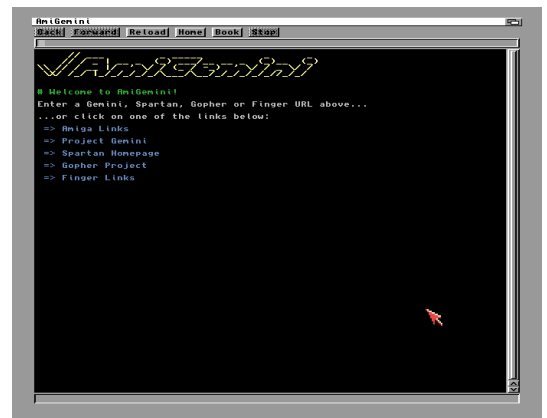

**Gemini requires AmiSSL or a proxy to perform encryption.**

**Spartan is like Gemini but does not require AmiSSL.**

**Finger is a user information protocol that predates Gopher.**

**Nex is a simple protocol inspired by Gopher and Gemini.**

**Source code is included.**

## System Requirements

### Classic Amiga

#### Minimum:

Workbench 3.0

TCP/IP stack.

#### Recommended:

68020 or better CPU

4MiByte Fast RAM

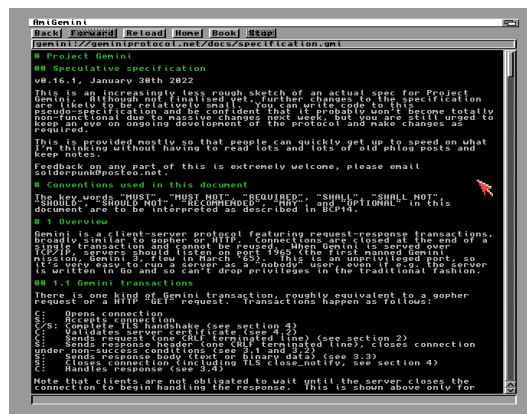

Workbench 3.1 or higher

TCP/IP stack

AmiSSL

### Amiga OS 4 & MorphOS:

AmiSSL

**AmiGemini is open source and uses the MIT License.**
