IBM 1440 and 1240 Consolidated Index

This publication is a consolidation of indexes of publications in the IBM 1440 and 1240 System Reference Library listed in the IBM 1440 and 1240 Bibliography, Form A24-3005. Entries are listed alphabetically, with the subject code and form number for the associated SRL publication.

230.02

PREFACE

This Consolidated Index can be used to help locate specific detailed information for a term, subject, function, or concept of the IBM 1440 or 1240 systems. To use this index, find the particular item in the alphabetic listing; then determine which subject-code reference best describes the information required. The publication, whose form number is shown opposite the applicable subject code, contains either a detailed index or a table of contents to indicate the exact location of the data being sought.

Wherever possible, the entries of this index contain an abbreviation of the publication title (1440 SORM, FORTRAN, 1440 AUTOTEST, etc) to help determine if a given entry applies.

Subject Code 80 (Installation Supplies) is not included in this index.

A special Reader's Survey Form is attached at the end of this publication. Please use this form for your comments regarding this publication.

<u>Subject Code</u>	<u>Subject Heading</u>
00	General Information
01	Machine System
03	Input/Output
05	Magnetic Tape
07	Disk Storage
09	Tele-Processing Equipment
13	Special and Custom Features
15	Physical Planning
19	Original Equipment Manufacturers' Information (OEMI)
20	Programming System (General)
22	Autocoder
24	COBOL
25	FORTRAN
28	Report Program Generator (RPG)
30	Input/Output Control System (IOCS)
32	Utility Programs
33	Sort/Merge
34	Disk Storage File Organization
36	Supervisors—Monitors
37	Automatic Testing Programs
48	Miscellaneous Programs

Major Revision, September 1965

This publication, Form A24-3344-1, is a major revision of, and obsoletes, Form A24-3344-0.

Copies of this and other IBM publications can be obtained through IBM Branch Offices. A form has been provided at the back of this publication for readers' comments. If the form has been detached, comments may be directed to IBM Product Publications, Endicott, New York 13764.
