IBM System/370 and 4300 Processors Bibliography

For use by those who plan for, install, program, or operate an IBM System/370 or 4300 Processor, this bibliography describes technical publications which document:

- Machine components,
- System Control Programming (SCP) and Selectable Units, DB/DC and system support licensed programs,
- Other supplementary information (e.g., forms, PTF listings).

Features, and kinds of information included, are:

- Titles and *abstracts*, with page counts,
- Clustering* and sequencing of items by title,
- Second list in *order-number sequence*, with *subject codes* explained and indexed,
- Specific page lookup by *program acronym*,
- Description of *selectable unit* publications and their distribution,
- Current status* of the publications listed, with TNLs,
- SLSS publication profiles* used in distribution, with an explanation of these profiles,
- Details on order numbers, including *pseudonumbers*.

For System/370 publications on industry systems and licensed *application* programs, refer to GC20-0370.

Fourth Edition (October 1979)

This is a major revision of, and supersedes, GC20-0001-2 and its Technical Newsletter.

It is possible that this material may contain reference to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Publications are not stocked at the address given below; requests for IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

A form for readers' comments is provided at the back of this bibliography. If the form has been removed, comments may be addressed to IBM Corporation, Publications Support Services, Dept. 812, 1133 Westchester Avenue, White Plains, New York 10604. IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation whatever. You may, of course, continue to use the information you supply.

5973-L02 NETWORK INTERFACE ADAPTER (NIA) PRODUCT DESCRIPTION MANUAL

The IBM 5973-L02 Network Interface Adapter (NIA) specifies code 9843 is used to connect SNA clusters (PUs type 1 and 2) to an IBM 3705 Communications Controller loaded with Program 5799 ARJ through either TRANSPAC in France, or DATAPAC in Canada.

This manual provides the operator of the IBM 5973-L02 NIA with the information that is necessary to understand in what environment and how the 5973-L02 NIA operates. Manual, 8 1/2 x 11 inches, 38 pages, 5/79 //14//5973/

GA19-5041

3287 PRINTER MODELS 1 AND 2 PROBLEM DETERMINATION GUIDE FOR RPOs: 7H0307, 7H0317, 7H0327

This Problem Determination Guide, (PDG), has been prepared for use with the IBM 3287 Printer, Models 1 and 2, when the following RPOs are installed: RPO 7H0307, RPO 7H0317, RPO 7H0327.

This document provides the operator with sufficient information to assess the possible cause of a printer failure and includes suggested remedial actions.

Manual, //14//3287/WT-ONLY 38 pages, 8/79

GA19-5167

3800 PRINTING SUBSYSTEM USERS GUIDE FOR FORM LENGTH 2 X 4 1/6 OR 8 1/3 INCHES, FORM LENGTH 3 X 4 1/6 OR 12 1/2 INCHES, RPO XA9753 AND RPO ZA9754

This publication provides detailed information about the 8 1/3 and 12 1/2 inch Forms Lengths, RPOs (XA9753 and ZA9754), two new custom features for the IBM 3800 Printing Subsystem.

It is intended for data processing managers, programming personnel, operators, and form designers.

Manual, 8 1/2 x 11 inches, 60 pages, 5/79 //14//3800/

GA19-5171

3287 PRINTER USER'S GUIDE FOR THE AUTOMATIC DOCUMENT INSERTION DEVICE RPO 7S0251

This manual describes the Automatic Document Insertion Device, a custom feature specifically designed for the IBM 3287 Printer. It gives detailed information for customer executives, programming personnel, and operators.

Manual, //14//3287/WT-ONLY 48 pages, 6/79

GA19-5172

3287 PRINTER MODELS 1 AND 2 SETUP INSTRUCTIONS

Explains how to set up the IBM 3287 Printer Models 1 and 2 equipped with the Automatic Document Insertion Device (ADID) custom feature.

Manual, //14//3287/WT-ONLY 6/79

GA19-5173

3287 PRINTER MODELS 1 AND 2 WITH THE AUTOMATIC DOCUMENT INSERTION DEVICE RPO 7S0251 PROBLEM DETERMINATION GUIDE

This problem determination guide is intended for use by operators of the IBM 3287 Models 1 and 2 with the Automatic document Insertion Device - RPO 7S0251. It is designed to save the operator time by pointing out possible causes of troubles that he can easily and quickly correct.

Manual, //14//3287/WT-ONLY 42 pages, 6/79

GA19-5175

AN INTRODUCTION TO THE IBM 5922 DOCUMENT READER MODEL S11 - RPO 7S0265

This manual provides introductory information about the IBM 5922 Document Reader Model S11, a product specifically designed for financial institutions and for use with the IBM 3600 Finance Communication System or the IBM 3270 Information Display System.

This publication, directed to customer and IBM personnel, gives general information on what the 5922 is, what it does, how it works, and how to use it. Furthermore, it contains information on document requirements, configuration guidelines, and programming.

Manual, //14//5922/ 40 pages, 7/79

GA19-5230

3278 DISPLAY STATION WITH BARCODE READER SETUP INSTRUCTIONS

This is a version of IBM 3278 Display Station Setup Instructions (GA27-2838), incorporating changes that are relevant to RPO ZA2415 (Barcode Reader).

Manual, 8 1/2 x 11 inches, 10 pages, 6/79

GA19-5231

3276 CONTROL UNIT DISPLAY STATION WITH BARCODE READER SETUP INSTRUCTIONS

This is a version of IBM 3276 Control Unit Display Station Setup Instructions (GA18-2017), incorporating changes that are relevant to RPO ZA2415 (Barcode Reader).

Manual, 8 1/2 x 11 inches, 12 pages, 6/79

GA19-5233

3287 PRINTER OPERATOR'S GUIDE FOR TRACTOR/FORMS SEPARATOR (RPO ZB7224)

This publication describes for the 3287 Printer operator how to install, operate, and remove the IBM 3287 Printer Tractor/Separator (RPO ZB7224). It also describes how to load and align margin-punched continuous forms on this device.

Manual, 8 1/2 x 11 inches, 26 pages, 5/79

GA22-7060

IBM 3033 PROCESSOR COMPLEX AND 3033 MULTIPROCESSOR COMPLEX FUNCTIONAL CHARACTERISTICS

This manual describes the functional characteristics and features of the IBM 3033 Processor Complex, Attached Processor Complex, and Multiprocessor Complex. For management, programming, and operations personnel experienced in System/370 operation, this manual provides a fundamental understanding of the three 3033 complexes.

The reader should have an understanding of data processing systems, including a fundamental knowledge of the IBM System/370 as defined in the IBM System/370 Principles of Operation, GA22-7000.

The manual focuses on the IBM 3033 and 3033-2 Processors (with processor storage, functions, and channels) and the IBM 3036 Console.

processor storage, functions, and channels) and the IBM 3036 Console.

features of the IBM 3033 Processor Complex and the IBM 3033 Multiprocessor Complex. For management, programming, and operations personnel experienced in System/370 operation, this manual provides a fundamental understanding of both 3033 complexes.

The reader should have an understanding of data processing systems, including a fundamental knowledge of the IBM System/370 as defined in the IBM System/370 Principles of Operation, GA22-7000.

The manual focuses on the IBM 3033 Processor (with its processing storage, functions, and channels) and the IBM 3036 Console.

Manual, 8 1/2 x 11 inches, 50 pages, 9/79

GA22-7065

IBM 3033 PROCESSOR COMPLEX AND 3033 MULTIPROCESSOR COMPLEX CONFIGURATOR

The configurator shows the standard and optional features, the processor storage capacities, and the channels and subchannels available for the IBM 3033 Processor. It shows the standard features available for the IBM 3042 Attached Processor. It also provides representative plan views of the IBM 3033 Processor Complex, Attached Processor Complex and Multiprocessor Complex.

Form, 8 1/2 x 11 inches, 2 pages, 1/79

4341 PROCESSOR OPERATOR'S GUIDE

This publication contains both reference and instructional information necessary to operate the IBM 4341 Processing Unit. It is intended primarily for the system operator who performs startup procedures, monitors and controls system operation, and responds to operating problems. Operating information related to software and peripheral devices is not included in this manual.

The information contained in this manual is organized into the following major sections: Introduction, Diskette Drive, Controls and Indicators, Display Screens, Operating Procedures, and Problem Determination Procedures. A list of error messages with explanations and recovery information is contained as an appendix.

Manual, 4341//01// 140 pages, 8/79

GA24-3671

4341 PROCESSOR CHANNEL CHARACTERISTICS

This manual describes how to check the effects of imposing loads on the channels of the IBM 4341 Processor. It is intended primarily for physical planning engineers and system analysts who are concerned that a proposed configuration of input/output devices will operate satisfactorily on the 4341 Processor.

The manual contains a description of the channels, channel data rates and possible effects of imposing heavy I/O loads on the channels. Procedures are given for checking data overrun, program overrun, and channel utilization. Also included are recommended channel programming conventions.

Manual, 4341//01// 68 pages, 9/79

GA27-3136

IBM SYSTEMS NETWORK ARCHITECTURE REFERENCE SUMMARY

This handbook contains summary information about the structure of SNA and SDLC, but mainly contains format and profile descriptions, and sense codes. All of the currently used field formatted RUs are included, as well as all of the currently used sense codes. The information contained in this handbook is intended to supplement the information contained in various manuals on specific IBM SNA products.

Handbook, 3 5/8 x 8 1/2 inches, Saddle Stitch, 36 pgs, 3/77

3863, 3864, AND 3865 MODEMS INTRODUCTION AND SITE PREPARATION GUIDE
This manual describes briefly the IBM 3863, 3864, and 3865 Modems and their roles in data communication networks. Also described, in general terms, are options, features, interfaces, and problem determination procedures. Site preparation requirements for the modems are described in detail.

This manual is intended for managers and planners who are knowledgeable in data communication networks and who are considering installing a data communication network using the IBM 3863, 3864, and/or 3865 Modems. The site preparation information in this manual is also useful to the modem user's contractors or other personnel who, before the arrival of the modems, prepare the user's site for setup of the modems.

INTERNATIONAL FIELD PROGRAMS PROGRAM INFORMATION AND INDEX
This brochure gives descriptions of all International Field Programs released through the International Field Program Center in Uithoorn through May 28, 1979.

International Field Programs are specially selected programs that provide opportunities for productivity improvements in many areas of DP operations, systems, and applications.

The objective of International Field Programs is to bring to IBM customers fresh approaches to current situations through the use of accelerated development techniques. Most International Field Programs are written and documented by IBM field personnel who have responded to the problems of today and the drive for improved productivity from both people and machines.
Booklet, 10.5 x 22 cm, 100 pages, 7/79 SLSS-ORD NO. ONLY

SB11-5325

APPLICATION DISPLAY SERVICES, IFF 5785-AAE, DESCRIPTION/OPERATIONS
This manual provides guidance for the installation and use of the Application Display Services program.
This program executes under the Conversational Monitor System, a component of VM/370.
The program is an application management tool which simplifies the design, implementation and testing of full-screen support services for interactive application programs running under VM/CMS.
The program provides automatic code generation for PL/I and COBOL application programs. It also supports the documentation of screen layouts by preparing SCRIPT files for printouts.

SYSTEM/370 MVS/TSO NCP/VS START/STOP - SNA TRANSFORM, LIC PROG 5785-EAF, NOTICE
The availability notice for the International Field Program NCP/VS Start/Stop-SNA Map describes the functions, the system and installation requirements, and the ordering information for this program.

A large proportion of time sharing terminals consist of devices behaving like IBM 2741 Communications Terminals and/or ASCII Terminals using Western Union Teletypewriter Exchange service Start/Stop code. These devices have traditionally been supported by TSO using TCAM in conjunction with the 3704/3705 Emulator Program.

This International Field Program is intended to provide an interim solution to the support of start/stop terminals with TSO/VTAM until TSO/NTO (Network Terminal Option of ACF/NCP/VS Release 2) becomes available.

Flyer, 8 1/2 x 11 inches, 6 pages, 7/79 SLSS-ORD NO. ONLY

SB11-5332

SYSTEM/370 NETWORK CONTROL PROGRAM/VS START/STOP SNA TRANSFORM, IFF 5785-EAF, DESCRIPTION/OPERATIONS
This manual is intended to provide an installation systems programmer with detailed information regarding the functions, operation, and installation of the program.

This manual includes a description of installation prerequisites such as the generation of a suitable NCP or PEP, and also provides operating procedures for both the system operator and the terminal user. The reader is assumed to be familiar with the installation and specifications of TSO, VTAM, and NCP/VS.

Manual, 8 1/2 x 11 inches, 44 pages, 8/79
//5785-EAF/WT-ONLY

LB11-5333

SYSTEM/370 NETWORK CONTROL PROGRAM/VS START/STOP SNA TRANSFORM, IFF 5785-EAF, SYSTEMS GUIDE
This manual is designed to provide detailed information about the techniques used by and the method of operation of the program.

This manual is intended for system programmers who have a need to diagnose any problems that may occur during the running of the program, or who plan to enhance the program by providing additional facilities. The reader is assumed to be familiar with 3705 Communication Controller hardware, to have a working knowledge of SNA data flow, and to be acquainted with the operation of the Start/Stop terminals which are to be used with the program.

Manual, 8 1/2 x 11 inches, 52 pages, 8/79

IBM VS APL IMS/VS/DB VS APL-DL/I INTERFACE IFF 5785-FAL, NOTICE
The VS APL-DL/I Interface is a generalized interface program between VS APL running under VSPC and the data base access method DL/I. It provides a powerful and easy-to-use data base extraction method in APL, thereby combining the data analysis power of APL with the data extraction power of DL/I.

Instead of importing extracted data from an IMS data base in the VSPC system, the VS APL user can read the data directly from live data bases. The interface is an Auxiliary Processor for VSPC and can run as a batch message program in an online IMS DB/DC system or as a DL/I batch program in a DB-only system.

The interface is designed to handle any number of simultaneously active APL users and can extract data from any number of data bases.

VS APL - DL/I INTERFACE, IFF 5785-FAL, DESCRIPTION/OPERATIONS
This manual provides information about the functions and the installations tasks for the VS APL-DL/I interface IFF. This program is a generalized interface between VS APL running under VS PC and DL/I. It is running as an auxiliary processor for VS PC and it can be used as a batch program in a DB system or controlled by an online DB-DC (IMS/VS)

SB11

GB21

system. The VS APL user can directly read from online data bases. One request can result in a large number of DL I calls and only the interesting segment fields will be translated and passed to the APL user in a character vector format.

The interface can handle any number of simultaneously active APL users and can extract from any number of data bases (logical, physical, support of secondary indexes).

The data bases or segments can be protected by passwords. For editing purposes user exits can be called. Start-up parameters are available to adapt the interface to specific installation requirements.

IMS/VS QUEUE LOADER, SYSTEM/370 303X PROCESSORS, IFP 5785-GAJ, NOTICE

The IMS/VS Queue Loader (IQL) basic component is an IMS application program that runs in a batch message processing (BMP) region, which can feed IMS/VS Message Queue data sets on the basis of data communication records extracted from a log tape of a previous IMS run. The log tape contains the transaction mix and rate that the user wishes to employ as the basis of IQL runs.

IQL is designed to assist the system programmer responsible for the maintenance and tuning of the IMS/VS system in performing regression tests during migrations to new IMS/VS workload. In this way, the performance and resource utilization may be optimized. In order to allow the evaluation of future requirements, the user can also simulate an increase in the system workload for measuring response time and throughput trends.

Flyer, 8 1/2 x 11 inches, 4 pages, 5/79

SB11-5342

IMS/VS QUEUE LOADER, IFP 5785-GAJ, DESCRIPTION/OPERATIONS

The IMS/VS Queue Loader (IQL) basic component is an IMS application program that runs in a batch message processing (BMP) region, which can feed IMS/VS Message Queue data sets on the basis of data communication records extracted from a log tape of a previous IMS run. The log tape contains the transaction mix and rate that the user wishes to employ as the basis of IQL runs.

By means of IQL, an IMS situation may be repeated more than once to test different IMS functions, to measure performances while changing some IMS parameters, or to evaluate system behavior at different transaction rates.

A great deal of effort has been given to making this tool as IMS release-independent as possible and to minimizing its impact on the IMS system.

SYSTEM/370 - NETWORK CONTROL PROGRAM BUILDER, IFP 5785-EAL DESCRIPTION/OPERATIONS

A major effort in setting up and maintaining Systems Network Architecture (SNA) networks is the construction and modification of Network Control Programs (NCPs).

The Network control Program Builder program creates NCP source programs from simple tables built by the user. It also automatically generates all the required node names according to a tried and tested, universally applicable convention, thus saving the user the effort of devising his own convention.

Partitioned Emulation Programs (PEPs) and local or remote NCPs can be constructed using the program.

This manual provides the information needed to understand, install, and successfully use the NCP Builder program.

An understanding of Systems Network Architecture and particularly Network Control Programs is also required.

VIRTUAL SEQUENTIAL ACCESS METHOD (VSAM) OPERATIONS UTILITY, FDP 5798-CYR, AVAILABILITY NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This FDP, written in Assembler, helps manage the utilization, relocation, and reorganization of VSAM files, data spaces, and catalogs. The utility retrieves information contained in the VSAM catalogs and produces VSAM Access Method Services (IDCAMS) jobstreams to back-up or reorganize the requested object (Cluster, Space, User Catalog, Master Catalog).

A powerful set of run time options allow the operations or systems programming staff a wide range of flexibility in manipulating VSAM objects. These options include the ability to have the program adjust the new file size based on actual space requirements and substitute new volume and extent information in the new definitions and REPRO jobstreams. Individual files or extents of files may also be moved from one data space to another.

ETSS-II BATCH LIBRARY INTERFACE TO POWER/VS, FDP 5798-CYZ, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This FDP, written in Assembler, will allow members in the ETSS-II library file to be inserted logically in normal DOS/VS batch job streams. ETSS-II library members may be logically inserted into batch job streams in a manner similar to the existing SLI (Source Library Inclusion) facility of POWER/VS.

The ETSS-II user with this product may now make the ETSS-II library file the focal point of his entire DOS/VS installation.

The user may include ETSS-II library file members into a standard DOS/VS batch job stream simply by specifying the name of the member on a standard POWER/VS SLI control card.

NETWORK PERFORMANCE ANALYZER - HOST, FDP 5798-CZR, NETWORK PERFORMANCE ANALYZER - CONTROLLER, FDP 5798-CZT, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

Written in ALC, the Network Performance Analyzer (NPA) collects communications network operating data for analysis.

GB21

GC20

NPA data may be helpful in highlighting the causes of performance degradation, such as excessive traffic at certain periods, or insufficient line capacity. It may also aid in isolating performance problems induced by high line or cluster error rates caused by temporary errors, or wide fluctuations in message rates.

With NPA data, networks may be tuned for greater efficiency, and potentially improved response times. Elements such as polling rates, network parameters, and line loading, may be modified and performance improved. Tuning may also free up capacity.

NPA information may also be helpful in capacity planning. Information such as 3705 utilization, message flow rates, and line usage rates, may help determine how much unused capacity exists for network growth.

The data may be displayed online as collected, or reviewed later at a terminal. Data of particular interest may be monitored on or offline for exceptions to user defined limits. The capability of displaying realtime information may be especially valuable during periods of poor performance. The data gathered is also available for formatting into reports for study, and comparison with previous periods. This allows modification of systems parameters, and observance of subsequent results.

NPA consists of a host application program and one or more modified NCP programs. It runs under VSI or MVS, with VTAM and/or TCAM. NPA can coexist with subsystems such as CICS, IMS, or TSO, but operates independently of them.

INSTALLATION MANAGEMENT DOCUMENTATION AID, FDP 5798-CZW, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This FDP, written in ALC, is an installation planning and operations management tool, particularly useful in a large complex DP environment. Its functions include creation and maintenance of the following:

- Computer room layouts (Note: If a 3800 is available, these are drawn to the same scale as IBM provided equipment templates)
- CPU to channel to control unit cable diagrams
- Subsystem cabling diagrams (DASD, TAPE, 2914)

The program uses a "model file" containing physical equipment characteristics and a "detail data file" containing user dependent equipment data (such as address, serial number, location coordinates, etc.) to create these diagrams and drawings. Changes can be made easily and updated drawings produced quickly to facilitate operational decision making, installation planning, and problem resolution.

This FDP is parameter driven and may be executed under TSO or in batch.

FORMAT/3800 II, FDP 5798-DAC, AVAILABILITY NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This FDP, written in Assembler, is a productivity aid for producing "pre-printed" or "formatted" forms for use on an IBM 3800 Printing Subsystem. FORMAT/3800 II includes the same functions as FORMAT/3800, 5798-CPN, and provides the user with a quick and simple method of preparing "formatted" forms using the FORMAT character set.

In addition, it generates online or offline syntax and allows "free-text" input in either character or hexadecimal form. As options, it has the ability to optimize generated COPYMOD statements for any line where there is no user data and to optimize "free-text" input if the free test data contains blanks. Also optionally, it produces COPYMOD statements with syntax as required for the IBM 3800 OFFLINE utility and an OPTION OVERRUN card for any specified lines per inch or the option not to produce an OPTION card.

A sample may be printed on either an IBM 3800 Printing Subsystem or an impact printer.

SYSTEM LOG DISPLAY AND SEARCH FACILITY, FDP 5798-DAL, NOTICE

This Availability Notice contains complete ordering information for the Program and all its related documentation, for management and data processing personnel who are prospective users of the program and others who require information concerning it.

This FDP, written in ALC, is a systems management aid for controlling and analyzing the operation of an MVS/JES2 system. It can improve the productivity of operations, scheduling, control, and systems programming personnel by providing much needed operational information. In many cases, problem determination time may be significantly reduced through the use of this FDP.

Information is provided in four displays: the System Log (SYSLOG) display, which allows the user to dynamically display (SCROLL) all MVS SYSLOG Data Sets, the Display Active display, Input Queue display, and the Output Queue displays. Much of the information provided by these displays have previously been unavailable or hard to obtain. Information is displayed on IBM 3270 display stations with 24, 32, or 43 display lines. This FDP will run either as a menu option to the TSO 3270 Display Support and Structured Programming Facility (SPF/TSO) program product 5740-XT8 Version 2.1 or 2.2, or as a TSO command processor. The display formats and command syntax of this FDP are similar to that of SPF/TSO.

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM (ACF/VTAM)
RELEASE 2, LIC PROG 5746-RC3, PROGRAMMING

This manual describes how to write an ACF/VTAM application program. An ACF/VTAM application program contains ACF/VTAM macro instructions which establish and terminate sessions, and perform communication functions with logical units and subsystems that are supported by ACF/VTAM.

A summary of the Contents of the manual is as follows:

- An overview of ACF/VTAM application programs and their relation to other elements in a teleprocessing network.
- Suggestions on how to organize an ACF/VTAM application program.
- A discussion of the concepts, facilities, and language for opening and closing a program, and for establishing a session with and communicating with logical units.
- Requirements and suggestions on using exit routines, handling errors and special conditions in the network and debugging an ACF/VTAM application program. The user is assumed to be familiar with Basic Assembler Language.
- Detailed explanations of how to code each macro instruction.
- Prerequisite Publications: None, however, ACF/VTAM General Information: Concepts, GC27-0463, may be helpful in understanding the concepts of an ACF/VTAM network.

ACF/TCAM, VERSION 2 GENERAL INFORMATION: FUNCTIONAL
DESCRIPTION

This publication provides an overview of Advanced Communications Function for the Telecommunications Access Method, (ACF/TCAM), Version 2, Release 1. The ACF/TCAM program product supports IBM's Systems Network Architecture (SNA) and operates with OS/VS1 and OS/VS2 MVS. All information in this manual pertaining to multiple-domain configurations and cross-domain operations applies to ACF/TCAM networks with the Multisystem Networking Facility (an optional feature). The manual describes ACF/TCAM's operation, in accordance with SNA, using an IBM 3705 Communications Controller loaded with either of the following IBM network control programs:

- NCP/VS, Version 5, can be used for single-domain networks only
- ACF/NCP/VS, Releases 1 and 2, can be used for both single and multiple domain networks.

The manual is directed primarily to data processing managers and system programmers who will design, install, or maintain a network that uses ACF/TCAM; application programmers can also use the manual to understand the context in which ACF/TCAM application programs execute. Manual, 8 1/2 x 11 inches, 90 pages, 5/79

/////5735-RC3

SC30-3132

ACF/TCAM, VERSION 2 INSTALLATION: GUIDE

This book is for users of the telecommunications access method (TCAM). It is a reference guide for the system programmer who must construct or modify a TCAM message control program (MCP) supporting IBM's Advanced Communications Function (ACF), Version 2. It explains how to write an ACF/TCAM MCP using assembler language coding conventions and how to use a variety of auxiliary service facilities. This book contains information that might be of use in planning and setting up a data communication system incorporating ACF/TCAM, Version 2 and Systems Network Architecture (SNA). The reader is expected to be familiar with ACF/TCAM Functional Description (GC30-3131) and to have a basic understanding of SNA.

/////5735-RC3

SC30-3136

ACF/TCAM, VERSION 2 OPERATION, LIC PROG 5735-RC3

This publication describes the ACF/TCAM operator commands and how these commands are used to control and monitor ACF/TCAM networks. It is primarily a comprehensive reference for an experienced OS/VS system operator who has been designated as the ACF/TCAM operator. System programmers and application programmers may use it, occasionally. And, although it is primarily a reference publication, its organization, from general to specific, enables the reader to use it tutorially.

This publication contains five chapters and three appendixes. Chapter 1 briefly reviews some concepts pertaining to ACF/TCAM and then describes the physical and logical elements of both single- and multiple-domain networks. Chapter 2 defines the operator's activities. It also describes how to format and enter basic operator commands; how to respond to ACF/TCAM messages that require operator action; and how to coordinate a multiple-domain network. Chapter 3 describes how to start, restart and stop ACF/TCAM and includes descriptions of the initiator and initiator commands. Chapter 4 describes the basic operator commands. Chapter 5 describes the optional extended operator control system service program (SSP) and the extended operator commands. This chapter also describes the save/restore message queues system service program (SMQ SSP) and the SMQ commands. Appendix A is a quick reference summary of basic operator commands and initiator commands. Appendix B is a quick reference summary of extended operator commands and SMQ commands. Appendix C lists the message number and message text of messages likely to be received.

SC30-3137

ACF/TCAM, VERSION 2: DIAGNOSIS, LIC PROG 5735-RC3

This manual can be used three ways: as a source of hints for originally coding the ACF/TCAM message control program (MCP) in a manner that facilitates the detection, handling, and diagnosis of error conditions that occur while ACF/TCAM is running; as an aid in diagnosing certain problems that occur due to incorrect coding of MCP macros; and as a guide to the selection and running of ACF/TCAM diagnostic aids that facilitate troubleshooting and debugging in an ACF/TCAM

SC30-3140

ACF/TCAM, VERSION 2 MESSAGES, LIC PROG 5735-RC3
This publication guides recipients of DKJ and IED system messages in establishing, maintaining, controlling and responding to an ACF/TCAM network. It is part of the OS/VS Message Library and contains:

- The DKJ and IED system messages applicable to ACF/TCAM
- Problem determination (Appendix A)
- Routing and descriptor codes (Appendix B)

This publication is intended for use by ACF/TCAM operators and programmers. The messages are listed in alphanumeric order, and each listing includes an explanation of the message as well as a statement of any resultant system action and any necessary programmer response and operator response. Users of ACF/TCAM may replace the corresponding section of their system messages book with these pages.

SC30-3142

ACF/NCP/VS NETWORK CONTROL PROGRAM SYSTEM SUPPORT PROGRAM SYSTEM SUPPORT PROGRAMS INSTALLATION 5735-XX1 AND 5735-XX3

This publication provides the information necessary to define and generate an Advanced Communications Function for Network Control Program/VS (ACF/NCP/VS) for the IBM 3705-I and 3705-II Communications controllers.

The publication is directed to system analysts and system programmers responsible for preparing an ACF/NCP/VS to be used in communicating with an IBM System/370 in which one or more of the following access methods are being executed: ACF/TCAM, ACF/VTAM, TCAM, and VTAM. Also in this publication is information on the partitioned emulation programming (PEP) extension to ACF/NCP/VS, which permits the 3705 to emulate the operation of an IBM 2701, 1702, 9r 2703 transmission control unit for specified communication lines. Stations on these lines communicate in emulation mode with application programs in the System/370 via BTAM, QTAM, TCAM, or equivalent access methods that can be used with the transmission control units mentioned. Prerequisite Publications: ACF/NCP/VS General Information manual (GC30-3058).

Manual, 8 1/2 x 11 inches, 474 pages, 5/79

SC30-3143

ACF/NCP/VS NETWORK CONTROL PROGRAM SYSTEM SUPPORT PROGRAMS UTILITIES, LIC PROG 5735-XX1, RELEASE 2

This publication provides the information necessary to use the Advanced Communications Function Trace Analysis Program (called ACF/TAP), the OS/VS loader and dump utilities, and the DOS/VS loader and dump utilities. The Advanced Communications Function Trace Analysis Program (ACF/TAP) is an IBM service and that increases the usefulness of trace data by providing:

- A common trace analysis facility for ACF/VTAM, ACF/TCAM, and ACF/NCP trace data.
- Output reports that show SNA and SDLC network trace data in formats that are easy to read and understand.

The independent loader utility program is for use when you wish to load a local network control program into a communications controller before assigning the controller to the access method. An OS/VS and a DOS/VS version of the independent loader program are available.

The independent dump utility programs (OS/VS and DOS/VS) are used to dump the storage contents of a 3705 communications controller. The dynamic dump utility programs (OS/VS and DOS/VS) are used in emulation mode only to obtain dynamic dumps of storage or of the emulation trace table and to start the emulation mode line trace function.

This manual is for IBM customer engineers, program support representatives who use ACF/TAP and the loader and dump utilities to provide hardware and program maintenance for customer data communication networks.

A general knowledge of traces, SNA (SDLC and networking), VTAM or TCAM access methods, and communications controllers is a prerequisite for using ACF/TAP, the loader utilities, and the dump utilities. This publication has no prerequisite publications.

ACF/NCP/VS NETWORK CONTROL PROGRAM SYSTEM SUPPORT PROGRAM MESSAGES

The ACF/NCP/VS Network Control Program and Support Programs Messages publication is a reference book for messages issued by the following system support programs associated with Version 1, Release 2 of ACF/NCP/VS:

- The Advance Communications Function/Trace Analysis Program (ACF/TAP)
- The Independent Loader Utility, provided as an NCP system service program, under OS/VS
- The Dynamic Dump Utility, provided as an NCP system service program, under OS/VS (emulation mode only)
- The 3705 Communications Controller Assembler program (messages issued during stage 1 of NCP generation)
- The Independent Loader Utility, provided as an NCP

- system service program, under DOS/VS
 - The Dynamic Dump Utility, provided as an NCP system service program, under DOS/VS
 - The Independent Dump Utility, provided as an NCP system service program, under OS/VS and DOS/VS
- This publication is provided for persons who operate, maintain, or generate an Advanced Communication Function Network control program.

VSE/3890 DOCUMENT PROCESSOR SUPPORT, LIC PROG 5746-DC1, GENERAL INFORMATION

This publication provides general information concerning programming support for the IBM 3890 Document Processor operating under VSE/Advanced Functions Release 2.

Sections in this manual provide the reader with introductory information on the 3890 DOS/VSE support functions, operating environment, and a comparison with the 3890 DOS/VS Application/Installation Support (Field Developed Program 5798-BDC).

Prerequisite publications are: IBM 3890 Document Processor Machine and Programming Description, GA24-3612; VSE/Advanced Functions Macro User Guide; VSE/Advanced Functions Macro Reference.

DOS/VS SORT/MERGE, 5746-SM1, FUNCTIONAL DESCRIPTION

GC33-5377

DOS/VSE SYSTEM GENERATION /////5746-SM1

The manual provides information for installing the IBM Disk Operating System/Virtual Storage Extended (DOS/VSE) and shows how to generate support for the various functions available with DOS/VSE.

Topics include step-by-step procedures for installing and tailoring the DOS/VSE system control programming (SCP), describe the supervisor generation macros, and, for planning purposes, give information on calculating the size of a supervisor, libraries, and disk storage requirements. The contents of the DOS/VSE SCP libraries is summarized as an aid for checking an installation-tailored system. The audience addressed are persons responsible for the installation, generation, and availability of an installation's operating system.

Use of the manual assumes the reader to be familiar with the following publications:

- DOS/VSE System Management Guide, GC33-5371
- DOS/VSE System Control Statements, GC33-5376
- DOS/VSE Operating Procedures, GC33-5378
- DOS/VSE System Utilities, GC33-5381

facilities in detail, including the format, parameters and functions of all VSE/ICCF commands, job entry language, macros, procedures and utilities.

VSE/ICCF is an online computing facility that provides terminal users with conversational access to the computer resources of an installation running under DOS/VSE with VSE/Advanced Functions. It allows users to enter, store in libraries, edit and retrieve text and data, and also to write, change, compile, test and debug programs with the results displayed back at the terminal or directed to a printer, or both.

/////5746-TS1

SC33-6069

VSE/INTERACTIVE COMPUTING AND CONTROL FACILITY, LIC PROG 5746-TS1, MESSAGES

This publication lists and explains the messages which VSE/ICCF issues to the operator or to the programmer. It enables the operator or programmer to decide on the action that may have to be taken in reply to the message received.

Each message is preceded by an identifying number so that it can easily be found in the book. Messages that are issued by the same program are grouped together. Not included are messages issued by the ICCF command processors; they are documented in VSE/Interactive Computing and Control Facility Terminal User's Guide, SC33-6068 Manual, 8 1/2 x 11 inches, 116 pages, 6/79

SUPPLEMENT FOR VM/370 SEPP TO SYSTEM PROGRAMMER'S GUIDE, 5748-XE1
Provides the detailed information the system programmer needs to understand and use Release 2 of the VM/370 System Extensions Program Product. This publication, which supplements the IBM Virtual Machine Facility/370: System Programmer's Guide, discusses:
• How VM/370 preserves virtual storage when a virtual machine becomes inoperative
• Changes the method that VM/370 uses to manage the real processor
• Changes to the favored execution performance option
• Changes to the information that the INDICATE command provides
• Support for writing accounting records to disk and spool files to tape
• Support that expands a virtual machine's capability to control a 3270 display screen
• Requirements for using CMS/DOS tape label processing
• Support for fixed-block storage devices
• Support of the small-CP option
• Changes to the CMS file system
• Support for the 3289 Model 4 printer
• Multiple shadow-table support
• MVS/System Extensions support
• Dynamic SCP transition to or from native mode
• Single processor mode
Prerequisite Publication: IBM Virtual Machine Facility/370: System Programmer's Guide, GC20-1807.

SD23-9025

SUPPLEMENT FOR VM/370 BSEPP TO VM/370 CP COMMAND REFERENCE FOR GENERAL USERS, 5748-XX8

This document supports the VM/370 Basic System Extensions Program Product. It contains:

- Resource management facilities subset
- Virtual storage preservation support
- Accounting-records-on-disk support
- Spool-files-to-tape support
- Full screen support
- Enhanced 3270 support
- APL/Text support for the 3270
- Device support for 4300 processors

Manual, 8 1/2 x 11 inches
/////5748-XX8

LD23-9033

SUPPLEMENT FOR VM/370 BSEPP SYSTEM LOGIC AND PROBLEM DETERMINATION GUIDE (VOLUME 2), 5748-XX8

The IBM Virtual Machine Facility/370 Basic System Extensions program product provides significant performance and functional enhancements to the VM/370 system control program. These enhancements are:

- Support for the 3310 and 3370 direct access devices
- CMS File System enhancements
- Interactive HELP facility under CMS
- CMS/DOS uplevel to DOS/VSE

Manual
/////5748-XX8

LD23-9034

SUPPLEMENT FOR VM/370 SEPP SERVICE ROUTINES TO LOGIC, 5748-XE1

This supplement contains, in addition to functions available in the initial release of VM/370 System Extensions, the following:

- Support for the IBM 3289 Model 4 Printer
- Support for the IBM 8809 Tape Unit
- Support for the IBM 3310 and 3370 Direct Access Devices.

Manual, 8 1/2 x 11 inches,

DATAPAC/TRANSPAC, PROGRAMMING RPO ZA4239, LIC PROG
5799-ARJ, DESCRIPTION/OPERATIONS
DATAPAC and TRANSPAC are nation-wide packet-switching and shared-data networks. They have been designed to become one of the future Canadian and French networks for data communications and will support a wide variety of applications, with different traffic characteristics. The fundamental technique used in these networks is packet-switching. Packets of data from many users are dynamically interleaved over shared network transmission facilities, and routed to their destinations. Manual, 8 1/2 x 11 inches, 122 pages, 5/79
/////5799-ARJ

VSE/DATA INTERFILE TRANSFER, TESTING AND OPERATIONS
UTILITY, RELEASE 1, LIC PROG 5746-UT3
VSE/Data Interfile Transfer, Testing and Operations Utility (hereinafter referred to as VSE/DITTO) is a general-purpose utility program for card, magnetic tape, and disk input/output devices. It provides the facility to list, copy, alter, and create files or portions of files. The wide range of user-oriented functions is intended to aid programmer testing, reduce the need for separate specialized utility programs, and provide greater operational productivity. VSE/DITTO offers the user a tool for testing and file-handling in both batch and console operation. Flyer, 8 1/2 x 11 inches, 2 pages, 5/79

JES3 MONITORING FACILITY II, IUP 5796-PLW,
DESCRIPTION/OPERATIONS
JES3 Monitoring Facility II (JMF II) is a software monitor that provides the ability to measure and evaluate the performance of an existing IBM system operating under JES3 Release 3. This program Description/Operations Manual provides all the material necessary to install and operate the JMF II Installed User Program (IUP). It is intended for the systems programmer(s) responsible for maintaining and tuning the JES3/MVS operating system. An in depth knowledge of JES3 internals is required for proper and effective use of this program. This document does not provide that knowledge. Manual
/////5796-PLW

SH20-2177

DATA EXTRACTION PROCESSING AND RESTRUCTURING SYSTEM, IUP
5796-PLH, DESCRIPTION/OPERATIONS
This is a generalized data restructuring and extraction program. It takes sequential files and/or DL/I data bases, and restructures them or extracts information from them, to form new sequential files or different DL/I data bases. During the process, validity checking and data translation are performed. The system is driven by two high-level control statement facilities: Define, for data description, and Convert, for data restructuring.

The program consists of three components: a reader, a restructurer, and a writer. The system is written in PL/I and Assembler languages. It generates customized PL/I Programs and requires PL/I compiler and libraries for execution. It operates under OS/VS1, SVS, and MVS. Manual, 8 1/2 x 11 inches, 356 pages, 8/79
/////5796-PLH

SH20-2178

DATA EXTRACTION, PROCESSING AND RESTRUCTURING SYSTEM, IUP
5796-PLH, REFERENCE
The Data Extraction, Processing, and Restructuring System can access a wide variety of data and translate and restructure it for new uses. It is driven by two control statement facilities: Define, which the user codes to describe the data, and Convert, which the user codes to specify how the data is to be restructured.

This manual describes the Define and Convert control statements in detail, provides many examples, and explains techniques for correcting errors. Manual

SH20-2341

VS APL EXTENDED EDITOR AND FULL SCREEN MANAGER, IUP
5796-PLY, DESCRIPTION/OPERATIONS
This manual describes the functional capabilities of the VS APL Extended Editor and Full Screen Manager. It contains a general overview of the editor, detailed descriptions of the commands available, and illustrations of the usage of the commands. Also included are the instructions necessary to install and use the VS APL Extended Editor and Full Screen Manager.

The VS APL Extended Editor is written in S/370 Assembler and is a replacement for the standard APL del-editor. The Extended Editor supports the hardware editing features of the 3270 display station, and aids the APL programmer in the creation, modification, and testing of programs in a shorter amount of time.

The Full Screen Manager is an auxiliary processor that allows the APL programmer to manipulate the 3270 console in full screen mode. The auxiliary processor, AP124X, is similar to the APL124 auxiliary processor for VSPC and CICS. AP124X has some additional capabilities that are not available in the versions for VSPC and CICS.

Some of the major features of this IUP are:

- Full Screen Support for Editor
- Full Screen Support for APL programmer
- Multiple Function Parallel Editing
- Execution of APL expressions within the Editor
- Context Editing commands
- Ability to Edit Character Matrices and Vectors
- Compatibility with del-editor
- Similarity to CMS and TSC Editors

Manual, 8 1/2 x 11 inches, 144 pages, 8/79

SH20-2402

TIME SHARING OPTION 3270 DISPLAY SUPPORT AND STRUCTURED
PROGRAMMING FACILITY, LIC PROG, INSTALLATION AND CUSTOMIZER
GUIDE

The Structured Programming Facility is a program development tool designed to take advantage of the characteristics of IBM 3270 display terminals, and to increase productivity in the Time Sharing Option environment for users of both structured and conventional programming techniques.

The Structured Programming Facility operates under VS2 Release 1.7 (SVS) with Time Sharing Option/Telecommunications Access Method, or Release 3.7 (MVS) with either Time Sharing Option/Telecommunications

Access Method or Time Sharing Option/Virtual Telecommunications Access Method. The structured Programming Facility supports 24-line, 32-line, and 43-line IBM 3270 display stations, equipped with 12 or 24 program function keys.

This manual provides detailed information on how to install and customize the Structured Programming Facility. Manual, 76 pages, 7/79

GX20-1961

VIRTUAL MACHINE FACILITY/370 REFERENCE, LIC PROG 5749-010
REFERENCE SUMMARY COMMANDS (GENERAL USER
This reference summary contains CP Class G and Class Any
commands, RSCS commands, selected CMS commands, and selected
service aid statements and/or commands that the general user

can issue. This reference summary presumes that the user has a working knowledge of VM/370.

For VM/370 commands other than the commands listed in this reference summary, refer to VM/370 Commands (Other than General User), Order No. GX20-1995. For more extended but condensed information about VM/370 commands, see IBM Virtual Machine Facility/370: Quick Guide for Users, GX20-1926. Summary Card 8-1/2 X 3-5/8 folded, 16 pages
//36///5749

GX20-1995

REFERENCE SUMMARY VM/370 COMMANDS (OTHER THAN GENERAL USER)
No abstract available.
Reference summary card, 8 1/2 x 3 5/8 inches, folded
This reference summary contains CP Class A, B, C, D, E, and F commands, IPCS commands, selected CMS commands, and selected service aid statements and/or commands that system programmers, operators, and other specialized VM/370 users can issue. This reference summary presumes that the user has a working knowledge of VM/370.

It is possible that this material may contain reference to or information about, IBM products (machines and programs), programming or services which are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

For VM/370 commands for the general user, refer to VM/370 Commands (General User), Order No. GX20-1961. For more extended but condensed information on VM/370 commands, see IBM Virtual Machine Facility/370: Quick Guide for Users, GX20-1926.

DB/DC DATA DICTIONARY FIELD DEFINITION FORM FOR PL/I DATA
This coding form, used as an aid to the preparation of batch input for the DB/DC Data Dictionary program product, provides the means for bulk entry of data relevant to the definition of fields (data elements) in a PL/I structure. This form is used to collect data to add a new PL/I field to the data dictionary or to add data to an existing definition. Several types of records can be coded. Instructions for using this form are in DB/DC Data Dictionary Terminal User's Guide and Common Reference SH20-9083.
Padded form, 11 x 17 inches, u/m 25, 8/79

This document is completed by the customer when a problem occurs that cannot be solved by reference to the Problem Determination Guide or to other customer personnel. The completed form serves as a maintenance aid to service representatives.
Form, 8 1/2 x 11 inches SLSS-ORD NO. ONLY

GX33-9006

VSE/INTERACTIVE COMPUTING AND CONTROL FACILITY, LIC PROG 5746-TS1, REFERENCE SUMMARY
This booklet is intended as a convenient, pocket-sized guide to the most essential information needed by a terminal user of the VSE/Interactive Computing and Control Facility (VSE/ICCF). It contains a summary of information from the VSE/Interactive Computing and Control Facility Terminal User's Guide, SC33-6068.

The publication describes the following components of the VSE/ICCF command language: system commands, editor commands, job entry statements and procedures and macros. These commands, statements procedures and macros are listed alphabetically together with a description of their format, functions and operands.

VSE/ICCF is an interactive online computing facility that runs in a computing installation under the control of DOS/VSE with VSE/Advanced Functions. It allows users to conversationally enter and store data and programs from a terminal, to edit and format text data sets and to compile, run and test programs and have the results displayed back at the terminal and/or printed, either at a terminal-associated printer or at the central installation.
Reference Summary, 3 5/8 x 8 1/2 inches, 40 pages, 6/79

VSE/DATA INTERFILE TRANSFER, TESTING AND OPERATIONS
UTILITY, LIC PROG 5746-UT3, LOGIC
This manual describes the functions and logic of internal
operations, program structure and control flow, data flow,
data areas, and diagnostic information for the licensed
program VSE/Data Interfile Transfer, Testing and Operations
Utility.
It is intended for system programming personnel who may
need to modify the distributed version of the program.
Manual, 8 1/2 x 11 inches, 150 pages, 5/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

SY20-0884
VM/370 DATA AREAS AND CONTROL BLOCK LOGIC
This publication along with the IBM Virtual Machine
Facility/370: System Logic and Problem Determination Guide,
is intended for system programmers responsible for updating
VM/370. This publication contains descriptions of the major
data areas and control blocks used by three of the
components of VM/370: the Control Program (CP) the
Conversational Monitor System (CMS), and the Remote Spooling
Communications Subsystem (RSCS).
Manual, 310 pages, 2/76

JES3 MONITORING FACILITY II, IUP 5796-PLW SYSTEMS GUIDE
JES3 Monitoring Facility II (JMF II) is a software monitor
that provides the ability to measure and evaluate the
performance of an existing IBM system operating under JES3
Release 3.
This Systems Guide describes the logic of JMF II. It is
intended for the system programmer(s) who support the
JES3/MVS operating system.
An in-depth knowledge of JES3 internals is required for
proper and effective use of this program. This document
does not provide that knowledge.
Manual, 8 1/2 x 11 inches, 44 pages, 5/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY20-2426
VS APL EXTENDED EDITOR AND FULL SCREEN MANAGER, IUP
5796-PLY, SYSTEM GUIDE
This manual describes the operation and logic of the VS APL
Extended Editor and Full Screen Manager. It contains a
general overview of the editor components, the relationship
of the editor to the VS APL system, and the overall flow of
the VS APL Extended Editor.
The VS APL Extended Editor is written in S/370 Assembler
and is a replacement for the standard APL del-editor. The
Extended Editor supports the hardware editing features of
the 3270 display station, and aids the APL programmer in the
creation, modification, and testing of programs in a shorter
amount of time.
The Full Screen Manager is an auxiliary processor that
allows the APL programmer to manipulate the 3270 console in
full screen mode. The auxiliary processor, AP124X, is
similar to the APL124 auxiliary processor for VSPC and CICS.
AP124X has some additional capabilities that are not
available in the versions for VSPC and CICS.
Some of the major features of this IUP are:
• Full Screen support for Editor
• Full Screen support for APL Programmer
• Multiple Function Parallel Editing
• Execution of APL expressions within the Editor
• Context Editing commands
• Ability to Edit Character Matrices and Vectors
• Compatibility with del-editor
• Similarity to CMS and TSO Editors
Manual, 8 1/2 x 11 inches, 80 pages, 8/79 SLSS-IBM ONLY

LY20-2431
BATCH TERMINAL SIMULATOR II (BTS II), IUP 5796-PGT, SYSTEMS
GUIDE
This publication describes in detail the Batch Terminal
Simulator (BTS II). This includes an in-depth description
of the component modules, a discussion of modification aids
and error diagnosis, BTS II queues and tables, and macro
instructions.
Manual, 8 1/2 x 11 inches, 112 pages, 8/79 SLSS-IBM ONLY

LY20-2455
DOS/VSE REMOTE JOB ENTRY WORK STATION PROGRAM, LIC PROG
5746-RC9, LOGIC
This publication contains information on the internal
operation of the DOS/VSE Remote Job Entry Workstation
program. It is intended for use by persons involved in
program maintenance and by systems programmers who are
altering the program design.
Manual, 256 pages, 6/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

VSE INTERACTIVE PROBLEM CONTROL SYSTEM, LIC PROG 5746-SA1,
LOGIC
This manual describes the internal logic of the VSE
Interactive Problem Control System (VSE/IPCPS) Program
Product. The information contained in the manual is
directed to maintenance personnel and development
programmers who need to know about the design of IPCPS, and
its organization and data areas.
Manual, 8 1/2 x 11 inches, 100 pages, 5/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY30-3039
ADVANCED COMMUNICATION FUNCTION FOR TCAM LOGIC
This publication is a reference manual for ACF/TCAM system
control program base program feature number 9001, and
multisystem networking facility feature number 6003. It is
directed to the IBM program support representatives and the
systems engineers who provide program maintenance and who
need information on the internal organization and logic of
ACF/TCAM. It is a licensed publication available only to
holders of an ACF/TCAM license. This manual describes
general ACF/TCAM concepts that should be understood before
approaching the specifics of the internal logic. The
internal logic documentation covers:
• Functional flow of ACF/TCAM operations
• Program organization and operation of ACF/TCAM
• Diagnostic aids
• Aids in the use and servicing of ACF/TCAM
Prerequisite publications for this manual are:
• ACF/TCAM, Version 2 General Information: Functional
Description, GC30-3131, for general information
• ACF/TCAM, Version 2 Installation: Guide, SC30-3132,
to learn how to construct and modify a TCAM MCP
Manual, 8 1/2 x 11 inches, 850 pages, 5/79

ACF/NCP/VS NETWORK CONTROL PROGRAM, REL 2 - 5735-XX1, LOGIC
This publication covers the internal logic of Advanced
Communications Function for Network Control Program/VS

LY30

LY33

(ACF/NCP/VS), Release 2. ACF/NCP/VS operates under OS/VS ACF/TCAM, DOS/VS ACF/VTAM, and OS/VS ACF/TCAM.

This logic manual is designed to supplement the program listings for the NCP and to facilitate access to the information in the listings.

The ACF/NCP/VS logic manual is directed to the IBM support representatives and systems engineers who provide program maintenance and who need information on the internal organization and logic of ACF/NCP. This manual is a licensed publication available only to holders of an ACF/NCP/VS license.

Prerequisite Publication: ACF/NCP/VS (Network Control Program) Program Reference Summary, LY30-3043.
Manual, 8 1/2 x 11 inches, 933 pages, 6/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY30-3043

ACF/NCP/VS NETWORK CONTROL PROGRAM, LIC PROG 5735-XX1, RELEASE 2 LOGIC

This manual provides the system programmer and IBM program support representative with reference information about the Advanced Communications Function for Network Control Program/VS (ACF/NCP/VS), Release 2 and the Partitioned Emulation Programming (PEP) Extension. The Advanced Communications Function for the Network Control Program/VS controls the transmission of data between the host processor and the remote stations in the network connected to the IBM 3705 Communications Controller.
Manual, 8 1/2 x 11 inches, 396 pages, 5/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

SY32-5042

3851 MASS STORAGE FACILITY THEORY OF OPERATIONS: CARTRIDGE STORE

This publication is written for the customer engineer who maintains a 3851 Mass Storage Facility. A significant portion of the information in this publication was originally included in the maintenance documentation for the IBM Mass Storage Facility. It describes the components of the cartridge store, their interrelationships, and how they locate a specific cartridge and move it to the required location.
Manual, 8 1/2 x 11 inches, 125 pages, 3/79
SLSS - ORDER NO. SUBSCRIPTION ONLY

SY32-5043

MASS STORAGE FACILITY THEORY OF OPERATIONS: MASS STORAGE CONTROL

This publication provides a description of the hardware operation of the mass storage control portion of the 3851 Mass Storage Facility. It is intended for the IBM Customer Engineer who maintains the 3851 Mass Storage Facility. Additional users of this publication are the IBM program support representatives and personnel in the 3850 Mass Storage System support center.
Manual, 8 1/2 x 11 inches
SLSS - ORDER NO. SUBSCRIPTION ONLY

SY32-5044

3851 MASS STORAGE FACILITY THEORY OF OPERATIONS: DATA RECORDING CONTROL AND DATA RECORDING DEVICE

This publication is intended to give its reader a thorough understanding of the data recording control and data recording device portions of the 3851 Mass Storage Facility. It includes both introductory information and detailed descriptions of these devices.
This manual is written for the customer engineer who maintains a 3851 Mass Storage Facility. Additional users of this publication are the program support representative and personnel in the 3850 Mass Storage System support center. It is expected that all users of this manual have a general understanding of the concepts and operations of the 3850 Mass Storage System and System/370.
Manual, 8 1/2 x 11 inches, 240 pages, 3/79
SLSS - ORDER NO. SUBSCRIPTION ONLY

SY32-5045

3851 MASS STORAGE FACILITY: REFERENCE

This publication is intended to give its readers concise information about the topics mentioned below, some of which are not available elsewhere. It should be treated as a companion manual to the maintenance documentation for the Mass Storage System. Although this publication is mainly concerned with the 3851 Mass Storage Facility, we have incorporated information about the Staging Adapter wherever circumstances made such inclusions necessary.

The primary audience is the IBM customer engineer who maintains the 3851 Mass Storage Facility. Additional users are the program support representative and personnel in the 3850 Mass Storage System support center. It is expected that the users of this publication have a general understanding of the concepts and operation of both the 3850 Mass Storage System and the System/370.
Manual, 8 1/2 x 11 inches, 200 pages, 3/79

LY33-6034

CUSTOMER INFORMATION CONTROL SYSTEM/VIRTUAL STORAGE (CICS/VS) PROGRAM LOGIC: DESCRIPTION (OS/VS), LIC PROG 5740-XX1

The IBM Customer Information Control System/Virtual Storage

(CICS/VS) is a data base/data communication system that provides an interface between a System/370 operating system and user-written application programs. Applicable in most online environments, CICS/VS provides many of the facilities for standard applications: message switching, inquiry, data collection, order entry, and conversational and batched data entry.

CICS/VS is available as two program products: CICS/DOS/VS, which executes under control of the Disk Operating System/Virtual Storage (DOS/VS), and CICS/OS/VS, which executes under Operating System/Virtual Storage (OS/VS1 or OS/VS2). Both program products consist of modular components from which a user installation can select and tailor a CICS/VS system to meet particular application processing needs. This publication, together with its companion publication CICS/OS/VS Program Logic: Data Areas, deals with CICS/OS/VS.
Manual, 974 pages, 7/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY33-6035

CUSTOMER INFORMATION CONTROL SYSTEM/VIRTUAL STORAGE (CICS/VS), LIC PROG 5740-XX1, PROGRAM LOGIC: DATA AREAS (OS/VS)

The IBM Customer Information Control System/Virtual Storage (CICS/VS) is a data base/data communication system that provides an interface between a System/370 operating system and user-written application programs. Applicable in most online environments, CICS/VS provides many of the facilities for standard applications: message switching, inquiry, data collection, order entry, and conversational and batched data entry.

CICS/VS is available as two program products: CICS/DOS/VS, which executes under control of the Disk Operating System/Virtual Storage (DOS/VS), and CICS/OS/VS, which executes under Operating System/Virtual Storage (OS/VS1 or OS/VS2). Both program products consist of modular components from which a user installation can select and tailor a CICS/VS system to meet particular application processing needs. This publication, together with its companion publication CICS/OS/VS Program Logic: Description, deals with CICS/OS/VS.

The information contained in this manual is of interest to persons servicing CICS/OS/VS.

SY33-8560

DOS/VSE LIOCS VOLUME 2 SAM LOGIC

This reference publication is the second of four Logic Manuals that describe the internal logic of the Logical IOCS (Input/Output Control System) programs for the IBM Disk Operating System/Virtual Storage. The four related Logic Manuals are:

- Volume 1: General Information and Imperative Macros, SY33-8559
- Volume 2: SAM, SY33-8560
- Volume 3: DAM and ISAM, SY33-8561
- Volume 4: VSAM, SY33-8562

This manual is intended for use by persons involved in program maintenance and by system programmers who are altering the program design. Program logic information is not necessary for the operation of the program described.

Effective use of this publication requires an understanding of IBM System/370 operation and the DOS/VS Assembler language and its associated macro definition language. Reference publications for this information are listed in the front of the manual.
Manual, 436 pages
SLSS - ORDER NO. SUBSCRIPTION ONLY

LY33-9081

VSE/INTERACTIVE COMPUTING AND CONTROL FACILITY, LIC PROG 5746-TS1, LOGIC VOLUME I

This publication is the first volume of the logic documentation of the VSE/Interactive Computing and Control Facility (VSE/ICCF). It contains the following sections:

- Introduction
- Method of Operation
- Directory
- Data Areas
- Diagnostic Aids
- Interactive Usability Aids Macros

The internal logic of the individual ICCF modules is described in the second volume, LY33-9093 (which is available not only in hard copy form, but also on microfiche). Both volumes are intended for use by persons who have to do service or maintenance on ICCF programs. Program logic information is not needed for normal operation of ICCF; it is a supplement to the program listings.
Manual, 8 1/2 x 11 inches, 312 pages, 6/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY33-9093

VSE/INTERACTIVE COMPUTING AND CONTROL FACILITY, LIC PROG 5746-TS1, LOGIC VOLUME II

This manual is the second volume of the logic documentation of the VSE/Interactive Computing and Control Facility (VSE/ICCF). It consists of 'Section 3: Program Organization' of the entire logic material (the remainder is contained in Volume I, LY33-9081). The internal logic of each ICCF module is described in PSEUDOCODE, a design documentation language.

This publication is intended for use by persons who have to do service or maintenance on ICCF programs. Program logic information is not needed for normal operation of ICCF; it is a supplement to the program listings. This volume is also available on microfiche.
Manual, 8 1/2 x 11 inches, 852 pages, 6/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY33-9094

VSE POWER 5746-XE3 HANDBOOK
This publication provides a summary of VSE/POWER information for persons involved in program service activities. It contains, among others, a summary of the VSE/POWER operator commands and job entry control language, formats of important control blocks used by VSE/POWER and the RJE feature, and an overview of available service aids.
Manual, 100 pages, 7/79 SLSS-IBM ONLY

LY33-9095

VSE/IPCS HANDBOOK RELEASE 1, LIC PROG 5746-SA1
This publication provides a summary of VSE/IPCS information for persons involved in program service activities. It contains, among others, a summary of the VSE/IPCS operator commands and explanations of problem definitions and dump types.
Manual, 24 pages, 7/79 SLSS-IBM ONLY

LY35-0037

OS/VS1 MASS STORAGE SYSTEM EXTENSIONS LOGIC: MSS COMMUNICATOR (MSSC)
Describes the logic of the OS/VS1 Mass Storage System Extensions Communicator routines and provides diagnostic information about them. This information is directed toward support personnel who require an in depth knowledge of the design, organization and data area routines.
Manual, 8 1/2 x 11 inches, 1/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY35-0038

OS/VS2 MVS MASS STORAGE SYSTEM EXTENSIONS MSS COMMUNICATOR (MSSC), LIC PROG 5740-XYG, LOGIC
This publication describes the logic of OS/VS2 MVS Mass Storage System Communicator (MSSC) routines and provides diagnostic information. This information is for support personnel who require an in depth knowledge of MSSC's design, organization, and data areas.
Manual, 8 1/2 x 11 inches, 450 pages, 1/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY35-0039

OS/VS MASS STORAGE SYSTEM EXTENSIONS LOGIC: MSS SERVICES, LIC PROG 5740-XYG
This publication describes the internal logic of the function support routines (PSRs) that support the Mass Storage System Extensions and provides diagnostic information.

This information is directed to support personnel and development programmers who need an in-depth knowledge of the function support routines design, organization, and data areas.
Manual, 8 1/2 x 11 inches, 275 pages, 1/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY38-3013

ADVANCED COMMUNICATION FUNCTION FOR VTAM ENTRY (ACF/VTAME) LOGIC OVERVIEW
This manual is intended for maintenance personnel to obtain an overview of ACF/VTAME Logic for purposes of maintaining the program product at an operation level.
8 1/2 x 11 inches, 125 pages, 6/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY38-3014

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM ENTRY, LIC PROG 5746-RC7, LOGIC
This manual is the second part of a two-part description of the logic of the Advanced Communications Function for VTAM Entry. The first part is the ACF/VTAME Logic Overview, which describes the high level logic of ACF/VTAME. This manual describes the lower level logic, including system-dependent logic. This manual is primarily intended to help IBM program systems representatives quickly locate failures in the access method.

Included in this publication are HIPO diagrams that describe the logic of ACF/VTAME components, control flow diagrams which show the relationship between modules, and a synopsis of each ACF/VTAME module. With this information, a PSR can determine what module performs a particular function and how control passes to and from that module.
Manual, 8 1/2 x 11 inches, 7/79 SLSS-IBM ONLY

LY38-3016

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM ENTRY (ACF/VTAME), LIC PROG 5746-RC7, DATA AREAS
This manual describes the data areas used by ACF/VTAME. It is intended for IBM program system representatives and customer personnel who diagnose problems with ACF/VTAME. This publication contains data maps of all data areas used by ACF/VTAME.
Manual, 8 1/2 x 11 inches, 7/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY38-3018

NETWORK TERMINAL OPTION, LIC PROG5735-XX7, DIAGNOSIS AND LOGIC

This manual describes the logic of the Network Terminal Option (NTO) Program Product. This program product resides in the ACF/NCP and is used to allow selected START/STOP terminals to look like SNA devices (PU Type 1/LU Type 1) to the rest of the network. This manual is to be used by PSRs and Customer System Programmers to locate and fix NTO problems.

Manual, 8 1/2 x 11 inches, 300 pages, 3/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY38-3025

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM ACF/VTAM ENCRYPT/DECRYPT FEATURE, LIC PROG 5735-RC2, RELEASE 2
No abstract available.

Manual, 84 pages, 8/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

LY38-3027

ADVANCED COMMUNICATION FUNCTION FOR VTAM (ACF/VTAM) LOGIC: BASE SYSTEM VOLUME 1 METHOD OF OPERATION ACF/VTAM RELEASE 2
This manual is the second part of a three part description of the logic of ACF/VTAM for OS/VS1 and OS/VS2 MVS. Part one is the manual ACF/VTAM Logic: Overview, and part three is the manual ACF/VTAM Logic: Base System Volume 2 - Organization and Module Directory.

The three manuals are intended to help IBM program systems representatives locate failures in the access method. This manual contains hierarchy: input, process, and output diagrams that describe the components of ACF/VTAM in detail.

Manual, 8 1/2 x 11 inches, 8/79
SLSS - IBM INTERNAL SUBSCRIPTION ONLY

SY38-3029

ADVANCED COMMUNICATIONS FUNCTION FOR VTAM (ACF/VTAM), LIC PROG 5735-RC2, DIAGNOSTIC TECHNIQUES

This publication describes an approach to diagnosing ACF/VTAM problems and presents guidelines, tools, and information needed by program support representatives and system programmers to maintain system and application programs that use ACF/VTAM. The primary purposes of this publication are to:

- Provide information to enable the reader to use ACF/VTAM diagnostic facilities
- Summarize operating system serviceability aids described in other publications

Prerequisite publications for this manual are ACF/VTAM General Information: Concepts, and ACF/VTAM Installation.
Manual, 8 1/2 x 11 inches, 8/79
SLSS - ORDER NO. SUBSCRIPTION ONLY

LY38-3032

ADVANCED COMMUNICATION FUNCTION FOR VTAM (ACF/VTAM) LOGIC: BASE SYSTEM VOLUME 2 PROGRAM ORGANIZATION AND MODULE DIRECTORY ACF/VTAM RELEASE 2

This manual is the third part of a three part description of the logic of ACF/VTAM for OS/VS1 and OS/VS2 MVS. Part one is the manual ACF/VTAM Logic: Overview and part two is the manual ACF/VTAM Logic: Base System Volume 1 Method-of-Operations.

The manuals are intended to help IBM program systems representatives locate failures in the access method. This manual contains descriptions of the modules, control flow diagrams, and a list of the modules, description names, and their load of object modules.

Manual, 8 1/2 x 11 inches, 8/79

DATA EXTRACTION, PROCESSING AND RESTRUCTURING SYSTEM,
IUP 5796-PLH, NOTICE

XPRS-OS is a generalized data restructuring and extraction program. It takes sequential files and/or DL/I data bases, and restructures them or extracts information from them, to form new sequential files or different DL/I data bases. During the process, validity checking and data translation are performed.

The program consists of three components; a reader, a restructurer, and a writer. The reader reads in the source file records, and checks the values and formats of the items (fields). The restructurer provides the following functions:

- Selection of items or sub-hierarchy from the source record to form new record
- Selection of record by value of an item
- Creation of flat record from hierarchical record, and vice versa
- Creation of new flat or hierarchical record by combining two or more records
- Addition and deletion of items
- Elimination of duplicate records
- File sort
- Merging of files

Finally, the writer outputs the new record to the target file on the specified medium.

XPRS-OS is written in PL/I and Assembler languages. It generates customized PL/I programs and requires PL/I compiler and libraries for execution. It operates under OS/VSI, SVS, and MVS.

VS APL EXTENDED EDITOR AND FULL SCREEN MANAGER, IUP
5796-PLY, NOTICE

The VS APL Extended Editor and Full Screen Manager IUP is a powerful full screen editor replacing the standard del-editor of VS APL systems running under CMS or TSO. It utilizes the IBM 3270 Information Display system to enhance user and programmer productivity by aiding the APL programmer in the editing of functions and data. The full screen manager is an auxiliary processor that gives an APL application program running under CMS or TSO, the ability to format, read, and write an IBM 3270 Information Display System screen.

Release notice, /////5796-PLY 6 pages, 8/79

G321-5104

AUTOMATIC PROGRAMMING FOR ENERGY MANAGEMENT USING SENSOR
BASED COMPUTERS

An automatic programming approach has been developed for the use of sensor based computers (IBM System/7 and Series/1) for energy management in buildings. The purpose is to aid the facilities engineer who is unfamiliar with programming and who requires a system that can be defined by a sequence of questions and answers. Programmers can add or modify application source programs to extend the system to other user-defined functions.
